- Production bottlenecks, poor or nonexistent flow
- Ensuring operational capability to support innovation
- Labor costs exceeding plans, or unavailability of labor
- A lack of operational ability to respond to market demand
- Hitting critical production KPI targets on an hourly or daily basis

## Leverage TBM's deep expertise in industrial manufacturing to:

- Accelerate adoption of proven lean methods
- Strengthen supply chain management
- Increase workforce engagement and productivity
- Optimize operational efficiency and quality control
- Control spend and manage procurement efficiently
- Enhance quality, capacity, compliance, and cost-efficiency
- Improve equipment flexibility equipment/capacity utilization

## Driving Operational Excellence in Industrial Products for Over 30 Years

At TBM, we have over 30 years of driving breakthrough improvements in the Industrial sector. Our seasoned manufacturing consultants partner with you to accelerate productivity and performance through our specialized industrial products consulting services, focused on operational excellence, strategic asset management, and advanced manufacturing practices. Our commitment to speed in tackling your specific challenges and those of the industry means taking operational performance to the next level beyond your competition.

## Our industrial industry focus areas:

**Lean Transformation System:** Streamline operations and reduce waste through our Lean Transformation System. By analyzing and improving workflow efficiency, we help companies minimize production costs, enhance operational flexibility, and achieve consistent quality. Our approach includes optimizing production lines, reducing cycle times, and implementing pull systems to align production with customer demand.

**Asset Utilization:** Maximize asset performance with our strategic asset management services. We focus on increasing Overall Equipment Effectiveness (OEE) and ensuring preventive and predictive maintenance are carried out efficiently. Our strategies aim to extend equipment life, reduce downtime, and lower maintenance costs while boosting productivity.

**Talent & Leadership Solutions:** The sector demands a highly skilled workforce capable of managing advanced technologies and complex processes. We tailor our approach to your human capital needs by quickly improving your organization's talent capability and culture with innovative ways to find and develop high caliber, motivated employees at all levels of your operations.

**Management System:** Enhance your management system to drive success in operations. Our experts collaborate with your team to refine daily management processes, operational leadership, and align Key Performance Indicators (KPIs) to essential business metrics, ensuring that strategic objectives are effectively cascaded throughout all organizational levels.

## About TBM Consulting Group

TBM is a global operations and supply chain consultancy with deep roots in operational improvement and lean manufacturing. Many of our consultants have worked in or with manufacturers during the course of their careers—with extensive expertise in areas such as automotive, machinery, electronics, metals, textiles, and beyond. Our senior management consultants have 25+ years of hands-on experience in C-suite, operational leadership or continuous improvement roles.
